Web Programiranje 2

Filip Terzić 64/23

Smer: IT

1. Uvod

1.1 Korisceni programski jezici i tehnologije

Za sajt su korisceni HTML5, CSS3, JS - JSON, XML

1.2 Opis funkcionalnosti sajta

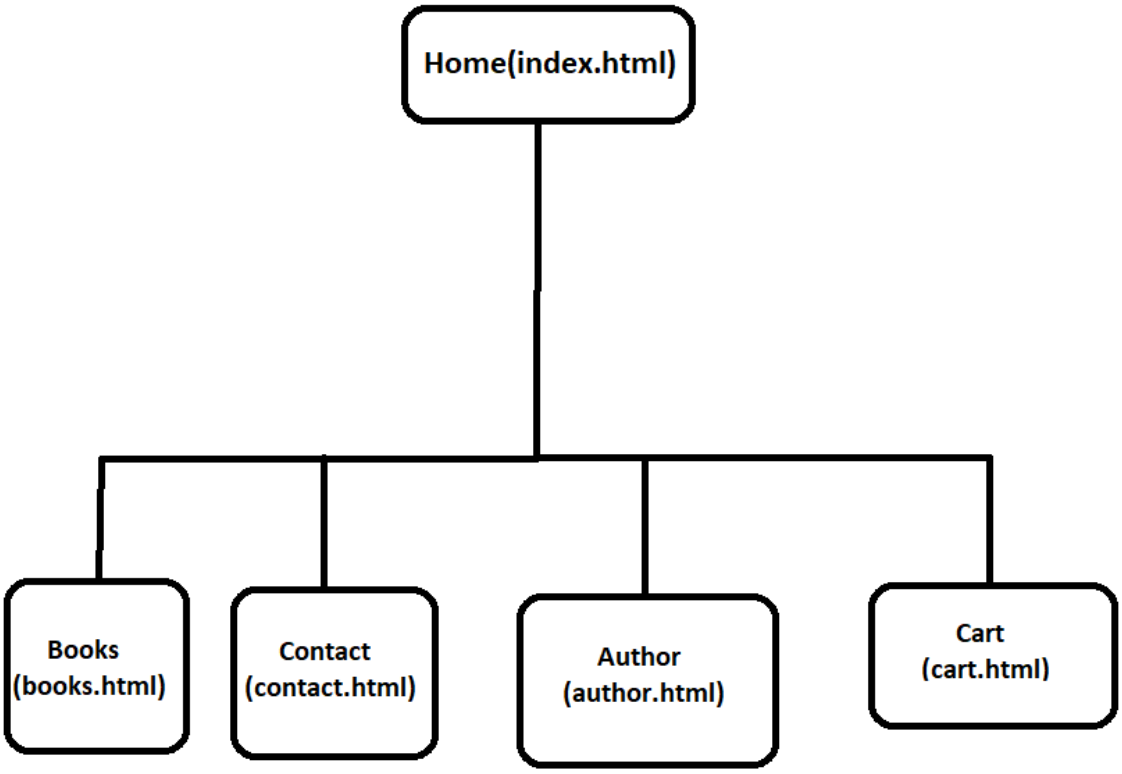
Navigacioni meni je dinamički generisan iz JavaScripta funkcijm loadNavbar() koja se poziva na svakoj stranici, zbog code reuse-a. Na isti način se generiše i footer kroz funkciju loadFooter() Knjige na stranici books se dinamički učitavaju sa servera putem AJAX poziva (fetch API) iz books.json fajla, uz obradu grešaka implementiranu kroz try/catch blokove koji korisniku prikazuju odgovarajuću poruku u slučaju neeke greške. Na stranici books.html implementirano je filtriranje knjiga po žanru, pretraga po naslovu, autoru i opisu, kao i sortiranje po ceni, oceni, naslovu i godini izdanja. Kada se klikne na dugme „Učitaj još" prikazuje se još knjiga. Korišćena je validacija kontakt forme sa proverom unosa imena, email adrese, broja telefona, teme i poruke, pri cemu se greške ispisuju pored odgovarajućeg polja i na vrhu forme. Implementirana je korpa za kupovinu koja koristi localSTorage za čuvanje podataka u sesiji, sa mogućnošću promene količine, uklanjanja knjiga i prikaza ukupne cene sa porezom, ukoliko cena predje 35 dolara, dostava je besplatna i tako se ispisuje. Korišćeni su hover efekti na karticama knjiga, animacije pri učitavanju stranice, kao i toast notifikacije koje obaveštavaju korisnika o akcijama poput dodavanja knjiga u korpu, brisanje korpe itd..

1.3 Template

Nije korišćen template.

2. Organizacija

2.1 Organizaciona Šema Sajta



2.2 Sitemap

```xml

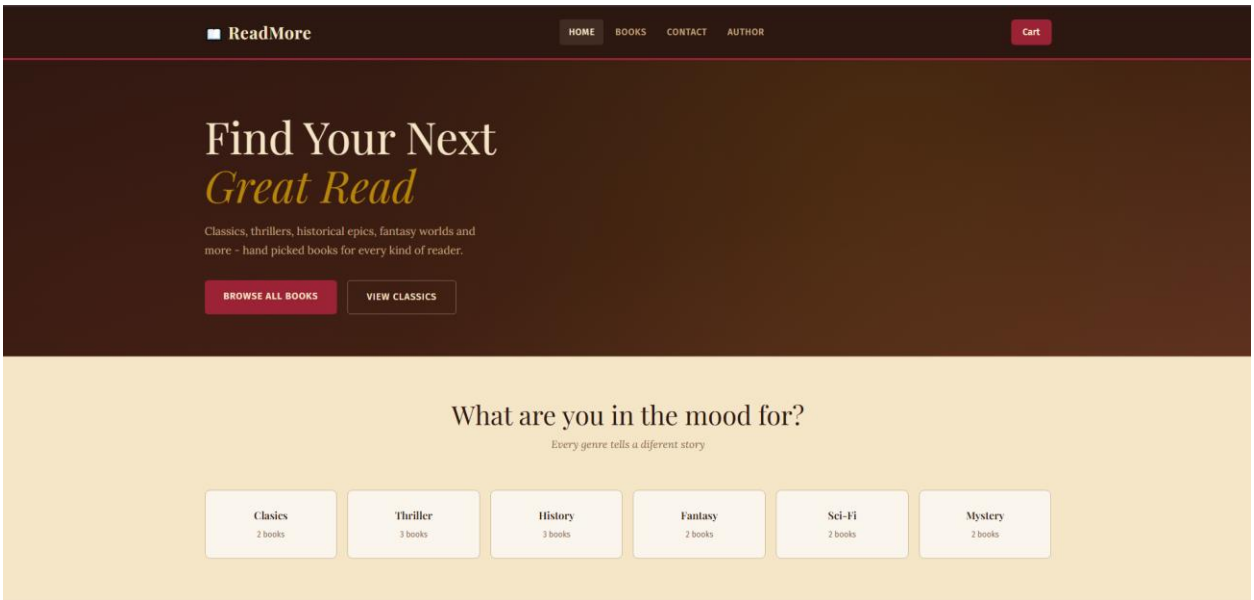
2.3 Slike stranica i opis funkcionalnosti

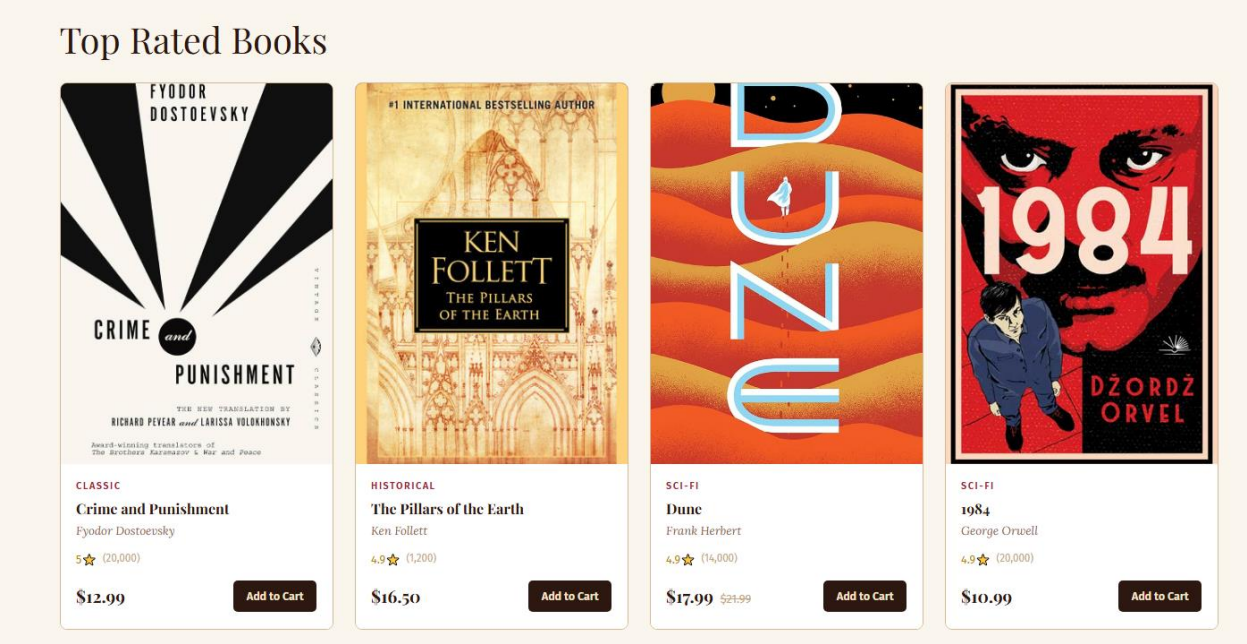
1. index.html



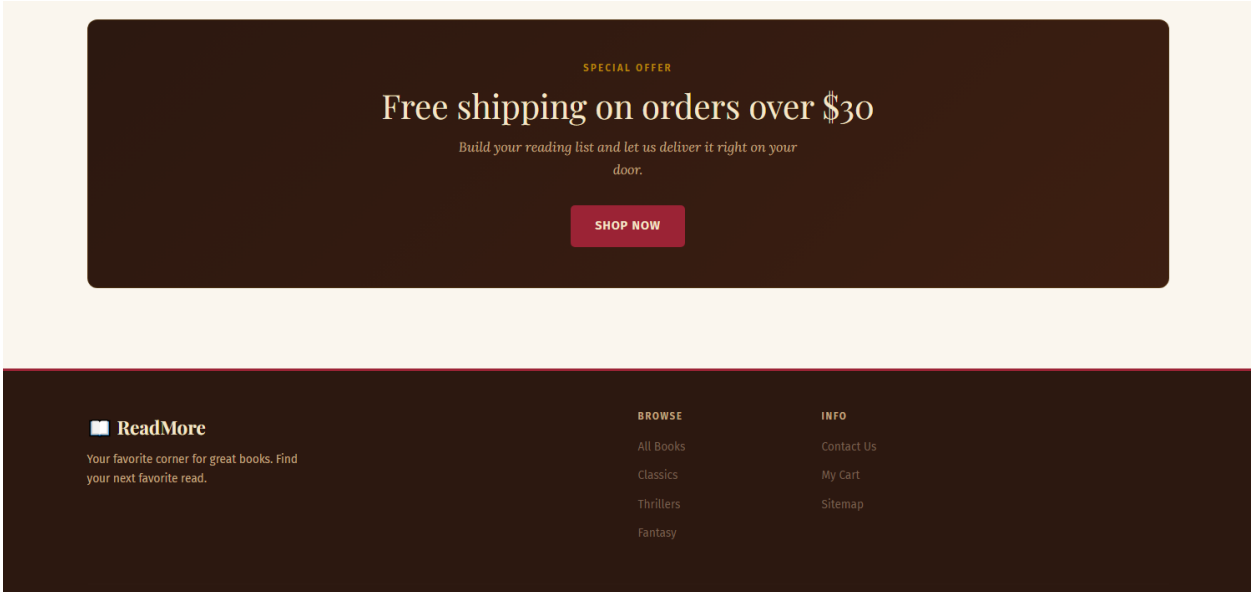
Početna stranica sadrži hero sekciju koja ima dva dugmeta, kliknom na levo dugme nas prebacuje na stranicu “books.html” gde ce se izlistati svi proizvodi. Klikom na desno dugme nas takođe prebacuje na stranicu “books.html” i automatski filtrira samo knjige koje spadaju pod klasike.

Ispod hero sekcije, postoji mala sekcija koja ima 6 divova razlicitih kategorija knjiga, kada

se klikne na neki od ovih divova, prebacuje nas na stranicu “books.html” i željeni žanr knjiga se automatski filtrira i prikazuje.

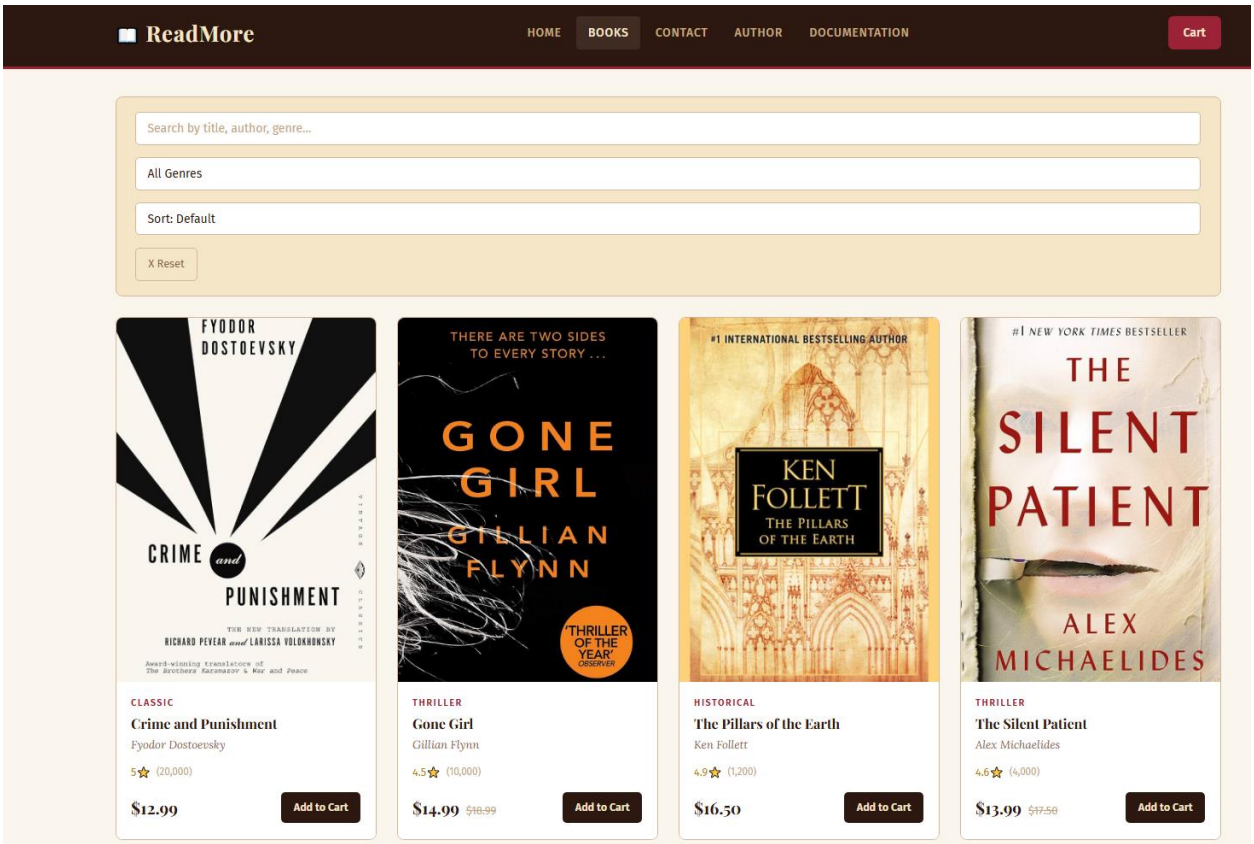


Sledeća sekcija prikazuje najbolje ocenjene knjige, koje sortira knjige po oceni. Klikom na dugme “Add to Cart”, zeljenu knjigu stavlja u korpu.

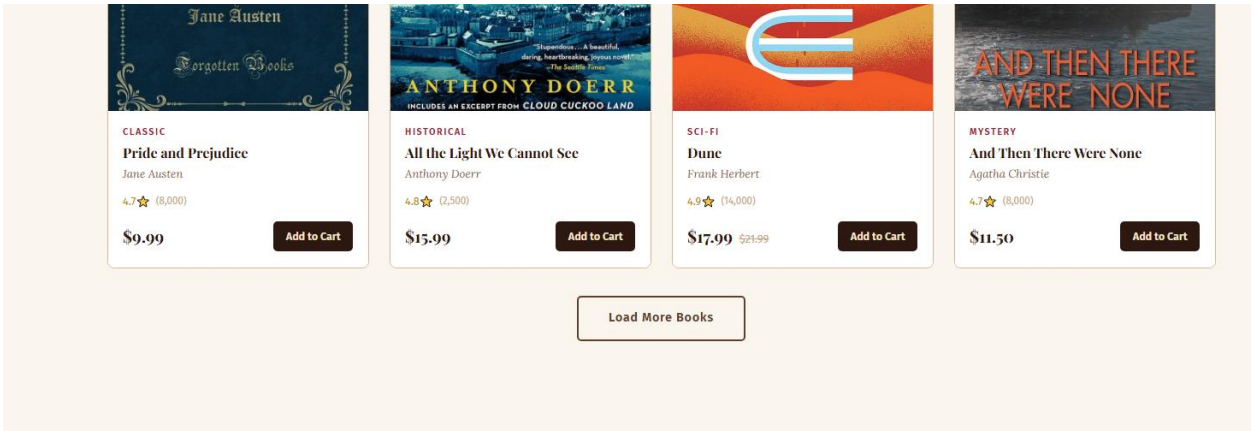


Dalje, na stranici se nalazi deo sa dugmetom i footer. Dugme klikom vodi na books.html. U futeru se nalaze ostale stranice i različiti žanrovi knjiga koje vode do istih.

2. Books.html

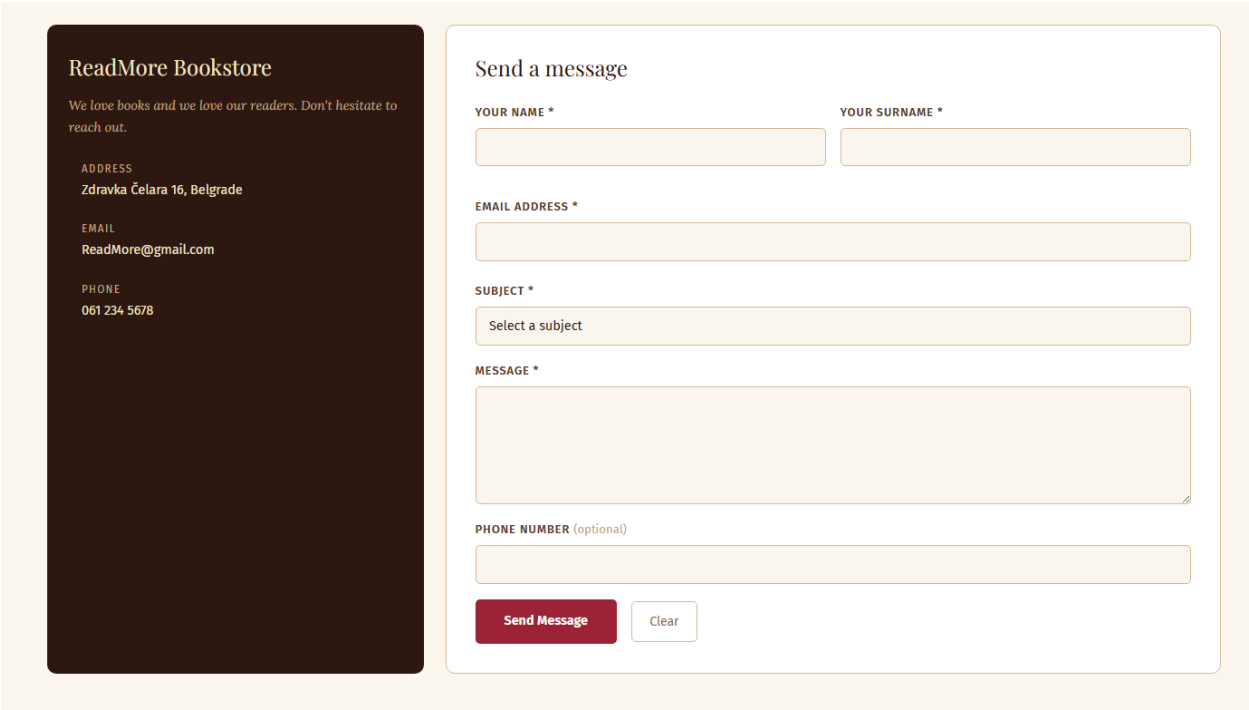


Na vrhu sekcije vidimo pretragu po naslovu, filtriranje po žanrovima, sortiranje po ceni, po godini objavljivanja, po rejtingu i po alfabetu.



Na dnu mozemo videti paginator dugme “Load More Books”, koje kada se klikne, učita se novi blok (4) knjiga.

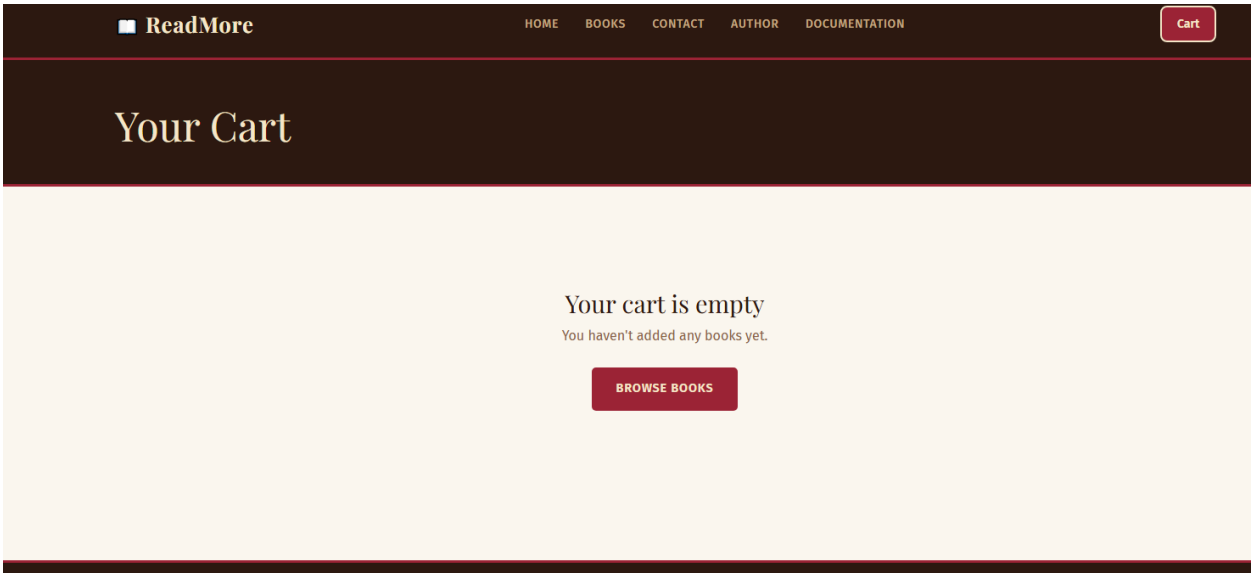
3. Contact.html



Jedini sadržaj kontakt stranice je forma koja je validirana. Ime i prezime moraju početi velikim slovom, imati više od 2 karaktera i ne smeju biti nepopunjeni.
E-mail adresa mora da bude u formatu “nešto@gmail.com” . Predmet/tema mora biti izabran, ako ostane na “select a subject” izaći će greška. Poruka je obavezna, mora imati minimum 10 karaktera i maksimum 500. Telefon ne mora biti unet, ali ako se unese, mora počinjati sa 06 ili +381 (Nema smisla što sam stavio srpski broj a stranica na engleskom, ali nema veze, čisto da bude formatiran).
Klikom na dugme “send message”, ako je sve u redu, forma se salje. Ako nešto ne valja, izbacuje grešku u gornjem delu forme i kod polja gde se nalazi greška. Klikom na dugme “Clear”, forma se resetuje.

4. Cart.html

Kada je korpa prazna, piše da je prazna i tu je dugme na koje kada se klikne, vodi nas do katalog (books.html) strane.



Ako ima nešto u korpi, prikazuje se sa leve strane komplet sa količinom, cenom i slikom. Imamo dugmad "-", "+", "x". Kada se klikne na "-", količinski se smanji jedan proizvod. Klikom na dugme + se povećava, a na "x", se totalno ukloni iz korpe. Sa desne strane imamo izračunatu koliko knjiga ima, njihovu cenu, i izračunatu taksu od 8%. Kada cena knjiga zajedno pređe $30, dostava je besplatna. Ispod svega vidimo dugme "Proceed to Checkout", klikom na njega submitujemo porudžbinu, a ispod možemo da kliknemo na "Continue Shopping" i to nas vraća na katalošku stranu. Takođe ispod proizvoda imamo 2 dugmeta. Klikom na "Clear Cart" pita nas preko confirm() da li smo sigurni u vezi brisanja korpe.
